

Fencing

FORTE® MEDIUM

Product description

The right solution for a better protection.
Plastic coated welded fencing with galvanised wire cores.

Forte® Medium has been developed for heavy duty residential applications. Its small mesh size combined with a high quality steel core make it a particularly robust product.

Our experienced process technology (galvanising, adherence priming and PVC coating) creates a high performance and high quality product. This process ensures we achieve a unique and lasting corrosion protection, a perfectly coloured PVC adherence and a smooth durable surface with good colour stability.

Forte® Medium is intended for high demanding applications as the small mesh size provides high impact resistance and has an aesthetically pleasing appearance.

Product conforms to the standard EN 10223-4.

Characteristics

Designation	Height cm	Length m	kg	rolls/pallet
100-21-5	101,6	25	28,9	12
120-25-5	121,9	25	34,5	12
150-30-5*	149,3*	25	43,0	12
180-36-5*	179,8*	25	51,4	12

* with defensive barbs of 20,0 mm

Mesh

Mesh size : 50,8 x 50,8 mm
Horizontal and vertical wire ø : 2,20/2,50 mm (pvc)

Coating

Colours

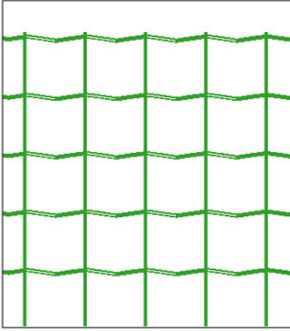

RAL 6005
RAL 9010
on demand
