

Razor wire, barbed tape wire, security services with razor wire

Razor wire or barbed tape wire is the advancement of barbed wire. On the razor wire the folded wire pieces with sharp spikes were replaced by sharp metal blades (blade wire).

The razor wire or barbed tape wire in this form is a lot more suitable for property protection and has almost completely replaced the barbed wire.

With razor wire your property is guaranteed protected from unauthorized intrusion of unauthorized people. Razor wire is the modern version of barbed wire – this very strong wire cannot be cut with normal tools.

connection clamp

The razor sharp barbed hooks of the razor wire and the small distances between the blades provide an effective protection for your property.

On the razor wire coils the twists are fixed with so-called connection clams so that the wire receives the one-of-the-kind tube/spiral like appearance.

Razor wire "special blade"

Measurements can differ due deviations caused by production

With spring steel core 54-56 twists

Ø 450 mm Ø 730 mm Ø 980 mm

Outer diameter of coil in mm	material design	recommended length	weight/coil in kg
450 mm (suitable for fence crest)	galvanized or stainless steel	8-10 mtr	7,0 kg
730 mm	galvanized or stainless steel	10-12 mtr	10,0 kg
980 mm	galvanized or stainless steel	12-15 mtr	12,5 kg

Razor wire "barbed tape"

Barbed tape

The barbed tape is wound up on one plastic spindle to 50 m each.

Razor wire without spring core

Measurements can differ due deviations caused by production

Material design	weight/coil	packed units
galvanized	2,5 kg	6 coils = 300 meter
stainless steel	2,5 kg	6 coils = 300 meter

Example:

Effective anti climb guard for double rod gratings

Mutanox – grid fencing with anti climb over protection

Razor wire dispenser

When unwinding the razor wire barbed tape the wire is twisted by the dispenser which is especially design for this. With that an even more effective protection is obtained. Also here you should use our established protection glove.

Barbed tape with dispenser

dispenser for barbed tape

Protection gloves for razor wire, s – wire and barbed wire

This specially designed protection glove consists of very thick threefold calf leather and a brass inlay.

Because of the sewn in brass inlay under the first leather layer the complete palm and thumb is effectively protected.

The penetration of the razor wire or barbed wire is almost impossible because of the brass inlay and it provides a very high cut protection also for other cutting tools.

This protection glove is unavoidable for your own security for fixing s-wire and barbed wire furthermore this gloves is very durable.

s-wire protection glove with brass inlay

also as protection for barbed wire

C-clamp for razor wire fixing

We recommend the c-clamp for fixing razor wire as they are produced solely for this purpose. The c-clamps are made of stainless steel and have a diameter of 3.5mm.

The ends of the razor wire c-clamps are diagonally arranged. With that the c-clamps interlock when pressed together with the special gripper.

The c-clamps guarantee to be an undoable but easy attach connection. They are suitable for universal use, e.g. fixing wire netting fences, double rod gratings and tension wires.

Easy fixture of razor wire
